### 01. Values & Vision

### Your overarching sustainability values

### Read associated article on CO

#### **TASK**

### **Identify business values**

### Personal values / areas of concern

Not sure? Use the <u>United Nations Sustainable Development Goals</u> to understand which global issues resonate with you personally.

#### Customers' values

Do a survey or some 1-2-1 interviews; Find out where else your customers shop or what causes they engage with.

#### **TASK**

### Your business and the industry

### Your existing business practices

Do you already do things that are addressing social or environmental impacts? Like using recycled materials or working with artisans?

### Sustainability issues in the fashion industry

Look at the key sustainability issues on CO to identify which ones:

- Impact your business the most
- Which ones you wish to tackle first

**COMMONOBJECTIVE.CO 3D BUSINESS SUITE: VISION** 

#### **TASK**

### **Craft your vision**

Read associated

article on CO

Use your identified values, combined with your existing business practices and top sustainability issues in the industry to craft a vision that embodies what the business should be striving to achieve.

### **Examples**

We dream of a time without landfill, when everything is recycled or composted. - Elvis & Kresse

To be an impact catalyst to create a fair and just world to the small scale marginalised organic farmers in India. To have a fully traceable supply chain from farmer to finished product. - Dibella India

We believe that together, through our daily actions, we can create a more sustainable future for people and the planet. That's why we're committed to buying better and inspiring change, so you can do the same. - Selfridges

# VISION2020 Our vision is for an industry where human rights and sustainability are not the effects of a particular initiative but the cause of a business well run. Where social and environmental injustices are not unfortunate outcomes but reasons to do things differently.

### **02. Prioritise Key Objectives**

How to prioritise your areas of focus

#### **FRAMEWORK**

### **Prioritising Objectives**

### **KEY OBJECTIVES**

Identify 2-3 priority objectives based on where the biggest cross-over is between: vision, areas of risk, and areas of influence. This provides a starting point for a sustainability roadmap that is rooted in the company's beliefs, and gives it the best chance at succeeding.

- 1.
- 2.
- 3.

#### TOOL

### Industry Hotspots: Where are the biggest risks?

This tool provides a guide as to some of the biggest areas of risk in the fashion industry today - as they relate to key global issues like poverty and climate change. It is by no means an exhaustive list; you can use this tool to identify other areas of risk in your supply chain or the industry at large.

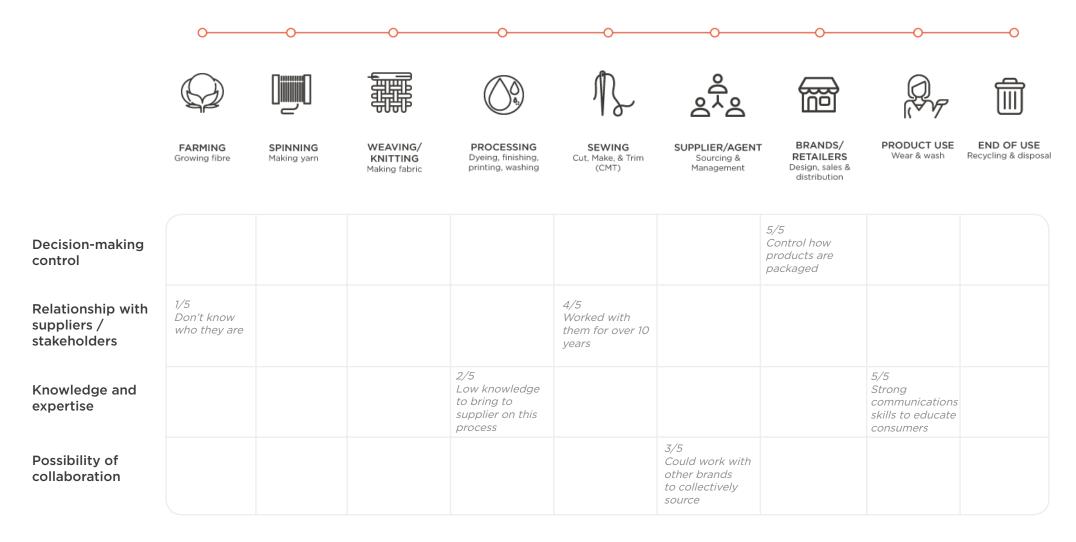

#### TOOL

### **Areas of Influence**

Read associated article on CO

Use this tool to assess which areas of your business you have most influence and therefore ability to affect change. In each box, provide a score of 1-3 (3 being highest) and make notes as to the nature of your influence in that part of your supply chain and operations.

#### **EXAMPLE**

### **Mara Hoffman - Key Objectives**

NB: This example was drawn from information available on Mara Hoffman's website

### **VALUES / VISION** "to design and manufacture our garments with greater care and to reduce our impact [and] generate awareness" RISK **INFLUENCE** Where products are Climate change - raw made - factory locations, materials, wet processing specific types of Poverty - raw materials, manufacturing manufacturers Decent work - garment Product design stage manufacturing choice of fabrics • Product use - customer awareness and behaviour

#### **KEY OBJECTIVES**

- 1. Materials "To produce a responsibly made product, choose each material with intention and care. When sourcing for our designs, prioritize natural, recycled, and organic fibers and do not use any fur, leather, or feathers. 100% of our swimwear is produced using recycled nylon or recycled polyester."
- 2. Manufacturing "Prioritize fair treatment of workers and artisans, and aim to minimize waste and energy usage wherever possible throughout the production of each garment."
- 3. Consumer behaviour and awareness -Encourage customers to care for their garments - extending their life, conserving natural resources, and keeping textile waste out of landfills.

COMMONOBJECTIVE.CO 3D BUSINESS SUITE: TARGETS

### **03. Create Targets**

### **EXAMPLE**

### **Targets: Reformation and Marks & Spencer**

VISION	OBJECTIVES	GOALS	ACTIONS
Reformation example:  To bring sustainable fashion to everyone	Social responsibility & accountability	<ul> <li>Monitor 100% Tier 1 &amp; 2 suppliers</li> <li>Build a social compliance program that focuses on capacity building rather than audits</li> </ul>	<ul> <li>Network with brands in shared facilities to reduce audit fatigue</li> <li>Grow monitoring and capacity building via preferred monitoring</li> <li>Align with a credible MSI focused on social responsibility; participate in early stages and help pilot new programs and initiatives</li> </ul>
M&S example:  To make M&S special again through sustainable, profitable growth that delivers value for customers, colleagues, shareholders, communities and planet alike.	Becoming a zero-waste business	By 2025, the 50 key raw materials used for M&S products will come from sources verified as respecting the integrity of ecosystems, the welfare of animals and the wellbeing of people and communities. This will cover 80% of M&S raw material usage by volume.

	Objective 1		Short term  Long term
	Objective 2		Short term  Long term
	Objective 3		Short term  Long term

COMMONOBJECTIVE.CO 3D BUSINESS SUITE: POLICIES

### 04. Policies

Read associated article on CO

#### **FRAMEWORK**

### **Building a Policy**

#### Vision, Objective, Targets/Goals

As per the previous templates in this guide

#### Scope

Clearly state what is and isn't covered by the policy -

### Requirements

- a) State clearly what the company will or will not tolerate as part of the business, and what measures will be taken to enforce this
- b) State what the company expects staff, external contractors and suppliers to do in this regard

### Reporting

A statement of commitment to continual improvement details of how the company will regularly report and review.

#### **EXAMPLE**

# Patagonia Post-consumer Recycling Strategy & Upcyling Policy

"Recycling is what we do when we're out of options to avoid, repair, or reuse the product first. Firstly: Reduce. Don't buy what we don't need. Repair: Fix stuff that still has life in it. Reuse: Share. Then, only when you've exhausted those options, recycle."

-Annie Leonard

Vision, Objectives, Goals

#### Worn Wear Recycling Strategy

Worn Wear seeks to repair and reuse Patagonia garments to extend their useful life, which is the most effective way to reduce the environmental footprint of our clothing. Not every product returned to us is suitable for continued use, however, and if we cannot repair or reuse the product we will recycle it.

Extending the life of garments aligns with the circular economy framework that emphasizes the importance of keeping materials flowing through the product lifecycle at their highest quality possible, continually reused and ideally avoiding landfills. Our goal is to repair and reuse as many products as possible and recycle 100% of everything else to avoid sending used products to the landfill or incineration as end of life solutions.

#### Implementation Overview: Prioritizing Repair and Reuse

To implement this strategy, when we receive used products, Patagonia does the following (in order of priority):

Requirements

- Repair: Build robust repair programs to keep people using the clothing they
  already own.
- Reuse: Support, encourage and develop programs for reusing clothing that is in good condition, including the following:
  - a. Resale of used clothing through our Worn Wear program, including instructions and e-commerce platforms. These items are marked

Scope
